PROFESSIONAL SUMMARY

Frontend Developer specializing in React.js, modern JavaScript, and high-performance UI engineering. Experienced in building scalable, responsive, and API-driven applications with strong emphasis on component design, state management, and performance optimization (lazy loading, memoization, code-splitting). Passionate about clean architecture, readable code, and delivering fast, user-focused experiences.

EDUCATION

Lovely Professional University

Bachelor of Technology in Computer Science and Engineering

Punjab, India

Oct 2020 – Jul 2024

Tulsi Vidya Niketan

Higher Secondary (CBSE Board) – 83%

Varanasi, India

Mar 2018 – Jul 2020

PROJECTS

WatchFlix - Streaming Web App | Live Demo

2025

- Built a movie streaming platform, Single Page Application(SPA) using React.js with custom hooks, reusable components, and Redux Toolkit for state management
- Integrated TMDB API with OpenAI for semantic movie search, and implemented RESTful API endpoints with real-time authentication, also Version control with Git
- Optimized performance using React memoization to reduce API latency by 25% and load times by 30%
- Deployed on Firebase Hosting with responsive design, ensuring 95% mobile compatibility

BiteSwift - Food Delivery Platform | Live Demo

2025

- Built responsive restaurant web app with React.js featuring dynamic homepage, search functionality, and cart management
- Utilized lazy loading, custom hooks, and sessionStorage to enhance performance and reduce load time by 30%, and Auth0 for user authentication
- Maintained over 90% test coverage using React Testing Library and Vitest
- Accomplished 100% responsive design across devices and reduced user navigation time by 25%

BookVerse - Book Discovery Platform | Live Demo

2025

- Engineered a fast, responsive book discovery platform (achieved **98% mobile responsiveness**) using React.js, Tailwind CSS, and modern component patterns.
- Optimized API calls with memoization and structured fetch logic, reducing redundant requests and improving reload speed by **35%**.
- Implemented lazy loading and shimmer placeholders for a smoother perceived performance, resulting in visibly faster page transitions and content rendering.
- Built dynamic search and trending sections with reusable hooks (`useBooks`, `useTrendingBooks`), ensuring scalable data flow and cleaner state management.

TECHNICAL SKILLS

Languages: JavaScript (ES6+), HTML5, CSS3

Frontend: React.js (19.2), Redux Toolkit, React Router

UI & Styling: Tailwind CSS, Responsive Design, CSS Flexbox/Grid

APIs & Backend: REST APIs, Fetch API, Firebase

Tools: Git, GitHub, npm, Webpack, Babel, Parcel

Testing & Performance: React Testing Library, Vitest, Jest, Memoization, Lazy Loading, Code Splitting

CERTIFICATIONS

• **The Complete 2023 Web Development Bootcamp** - Udemy

Jul 2023

• **Server-side JavaScript with Node.js** - Coursera

May 2023

• **Data Structures and Algorithms - Self Paced** - GeeksforGeeks

Jul 2022

• **Introduction to Programming Using Java** - Coding Ninjas

May 2022
