PROFESSIONAL SUMMARY

Full-Stack Developer (React/Node.js) shipping production-deployed apps end to end — a task management platform with a React frontend and secured Express/MongoDB API, a streaming platform with AI-powered search, and a food delivery app with 90%+ test coverage. Self-directed learner who spent 2+ years mastering the JavaScript ecosystem through real project delivery.

PROJECTS

- TaskForge – Full-Stack Task Manager** | *React 19, Node.js, Express, MongoDB, JWT, Zod* | **Live Demo** 2026
- Architected a production-deployed full-stack app: Express 5 REST API on Render and React 19 + Vite frontend on Vercel, with MongoDB and modular MVC structure (routes/controllers/models/middleware).
 - Implemented JWT auth with bcrypt hashing and end-to-end Zod validation shared between API middleware and React Hook Form; enforced per-user data isolation via ownership-scoped queries.
 - Delivered filtering, sorting, and pagination on task endpoints, Swagger/OpenAPI docs, rate limiting, Helmet security headers, and centralized error handling.
- WatchFlix – Streaming Web App** | *React.js, Redux Toolkit, Firebase, TMDB API, OpenAI* | **Live Demo** 2025
- Built a full-featured SPA using React.js with custom hooks, reusable components, and Redux Toolkit for state management.
 - Integrated TMDB API + OpenAI for AI-powered semantic movie search with real-time Firebase authentication.
 - Reduced API latency by 25% and load time by 30% via React memoization; deployed on Firebase with 95% mobile compatibility.
- BiteSwift – Food Delivery Platform** | *React.js, Auth0, React Testing Library, Vitest* | **Live Demo** 2025
- Built a responsive food delivery app with dynamic homepage, search, and cart using React.js and Auth0 authentication.
 - Achieved 90%+ test coverage with React Testing Library and Vitest; reduced load time by 30% via lazy loading and sessionStorage caching.
 - Delivered 100% responsive design across all devices, cutting user navigation time by 25%.
- BookVerse – Book Discovery Platform** | *React.js, Tailwind CSS, Firebase* | **Live Demo** 2025
- Built a fast book discovery platform achieving **98% mobile responsiveness** and **35% faster reload speeds** via memoized API calls.
 - Implemented lazy loading with shimmer placeholders and reusable custom hooks (`useBooks`, `useTrendingBooks`) for clean state management.

TECHNICAL SKILLS

Languages: JavaScript (ES6+), HTML5, CSS3
Frontend: React.js (v19), Vite, Redux Toolkit, React Router, React Hook Form, Custom Hooks
UI & Styling: Tailwind CSS, Headless UI, Responsive Design, CSS Flexbox/Grid
APIs & Backend: REST APIs, Node.js, Express.js, MongoDB, JWT, Zod, Swagger/OpenAPI
Testing & Performance: React Testing Library, Vitest, Jest, Memoization, Lazy Loading, Code Splitting
Tools: Git, GitHub, npm, Webpack, Babel, Parcel, Auth0, Render, Vercel

EDUCATION

Lovely Professional University <i>B.Tech in Computer Science & Engineering – CGPA: 7.01</i>	Punjab, India Oct 2020 – Jul 2024
Tulsi Vidya Niketan <i>Higher Secondary (CBSE Board) – 83%</i>	Varanasi, India Mar 2018 – Jul 2020
